Index

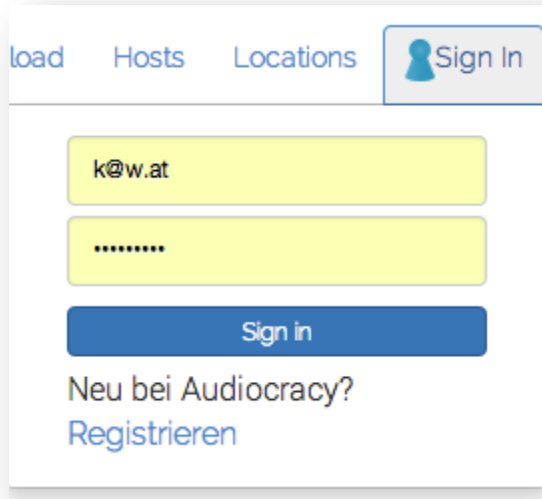

On the main page the user can get general information about Audiocracy. It is possible to download the app as well as the server software. In the top right corner the user can jump to the Download or Hosts section.

Screenshot 1 Index Page

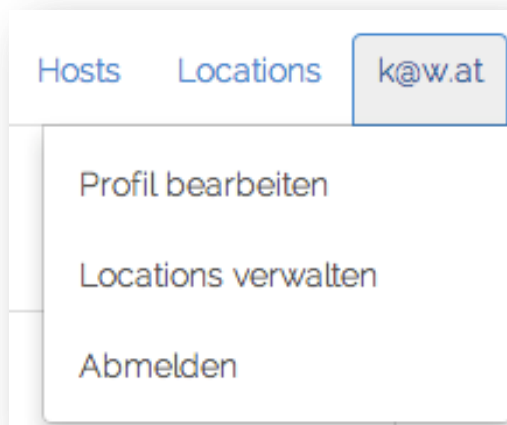

Drop Down Menu

By pressing the “sign in” link on the Index page a drop down menu appears which is used for logging in. If the user does not have an account the “sign up” link beneath the login button lets the user create an account. When a user is logged in, the drop down menu changes and it is possible to edit the user account and manage the locations of the user.

The screenshot shows a web interface with a navigation bar at the top containing links for 'load', 'Hosts', 'Locations', and a 'Sign In' button with a user icon. Below the navigation bar is a login form with two yellow input fields: the first contains the email 'k@w.at' and the second contains masked characters '.....'. A blue 'Sign in' button is positioned below the password field. At the bottom of the form, the text 'Neu bei Audiocracy?' is followed by a blue link 'Registrieren'.

Screenshot 2 Logged out

The screenshot shows the user dropdown menu after logging in. The navigation bar now includes 'Hosts', 'Locations', and the user email 'k@w.at' inside a box. The dropdown menu is open, displaying three options: 'Profil bearbeiten', 'Locations verwalten', and 'Abmelden'.

Edit Profile

On this page users can edit their personal profile and add information about them. The telephone number for example can be very useful if the admin of the page wants to contact the user via another way other than per email.

Locations

To navigate to the Locations page, the user has to click on “Locations” in the right-top corner of the index page. Here it is possible to view all the locations available on the map in the centre. On the left side is a list of all locations. Right beneath, all the offers are listed with an offer text and expiration date. If the user clicks on either one of the locations in the left list or on one of the markers on the map, a panel on the right side with all information about that location appears.

Screenshot 5 Locations Map Page

Manage Locations

While logged in, the user can add, edit and remove locations which will appear on the Locations map site. The user has to give the location a name and among other information. Most important is the address which automatically will show the location on the map on the right side of the page. The user can add pictures of their location by pressing on the choose button, which automatically upload the pictures. All added locations will appear in the table, where it is possible to edit and delete those. The edit button will redirect the user to a separate edit Location page.

Edit Location

On the edit location page it is also possible to add offers for the location. These will appear on the Locations page. An offer consists of the offer text itself and expiration date.

Maintenance

If the user has the role ADMIN the Maintenance Menu appears in the right-top corner after logging in.

Screenshot 8 Maintenance Menu

On these pages the an admin can delete unnessesary or offensive customers, locations or offers. These pages consist of tables and look very similar all together.
